Glenn County OptumServe Site Closure and Local At-Home Test Kit Distribution

GLENN COUNTY, CA — Glenn County's OptumServe Testing Site located at Orland Memorial Hall will be permanently closing on Thursday, June 30th at 11 AM. To ensure residents have timely and convenient access to testing after OptumServe's closure, Glenn County Public Health is partnering with Tri Counties Community Action Partnership (TCCAP) to coordinate local test kit distribution. Beginning on Friday, July 1st TCCAP will be distributing at-home test kits to Glenn County residents by appointment.

At-home test kits will be available to pick-up Monday through Friday in Willows and Orland.

Appointments are required for test kit pick-up; call the TCCAP COVID-19 Hotline at 1-855-268-2227 to schedule an appointment. Time and location details will be provided when the appointment is scheduled.

When should I test for COVID-19?

- If you have any symptoms – test immediately, even if you are vaccinated. If your test is negative but you continue to have symptoms, test again 24-48 hours later. Low amounts of virus early in infection can sometimes be missed by a test, and the test can be positive a few days later.
- If you have had close contact to someone with COVID-19. Close contact means you shared the same indoor air space with this person for greater than a total of 15 minutes in a 24-hour period.
 - Test immediately if you have symptoms of COVID-19 at any time.
 - Test within 3-5 days after exposure if you have no symptoms. *

**If you recovered from COVID-19 in the last 90 days and do not have new symptoms after a close contact, you do not need to test.*

Glenn County Public Health recommends residents get tested to assist in reducing the spread of COVID-19 in our community. For additional information, visit www.countyofglenn.net/COVID19 or call 1-855-268-2227.
